2. Features	
3. File Structure	
4. How to Run	
5. Admin Panel Usage	
6. Tech Stack	
7. Live Website	
8. Future Enhancements	

1. Project Overview

Zeepredict is a modern, responsive web-based sports prediction platform focused primarily on football. It allows users to view daily match predictions and betting tips, while providing an easy-to-use admin panel for managing content.

2. Features

Homepage	Sporty stadium background, hero section, navigation
Predictions Page	Displays all tips in attractive cards with match details
Admin Panel	Add, view, and delete predictions using localStorage
Design	Dark modern theme, fully responsive

3. File Structure

zeepredict/ ■■■ index.html (Homepage with sporty background) ■■■ predictions.html (Public predictions viewer) ■■■ admin.html (Admin dashboard) ■■■ README.md

4. How to Run the Project

1. Download and extract the project zip
2. Open **index.html** in any modern web browser
3. Use the navigation menu to switch between pages

5. Admin Panel Usage

Go to admin.html → Fill the form (Match, Prediction, Odds, Write-up, League) → Click Publish Tip

6. Tech Stack

- HTML5, CSS3, Vanilla JavaScript
- localStorage for data persistence
- Responsive design

7. Live Website

<https://martinzico35-afk.github.io/myworkspace>

8. Recommended Future Enhancements

- Connect to real sports APIs
- Add user accounts and authentication
- Live scores integration
- Search and filter functionality

- Backend with database
- Mobile PWA support
